ENGINEERING STRUCTURES

Index to Volume 19 (1997)

Number 1 (January) pp 1–96
Number 2 (February) pp 97–194
Number 3 (March) pp 195–286
Number 4 (April) pp 287–342
Number 5 (May) pp 343–396
Number 6 (June) pp 397–518
Number 7 (July) pp 519–604
Number 8 (August) pp 605–698
Number 9 (September) pp 699–796
Number 10 (October) pp 797–878
Number 11 (November) pp 879–968
Number 12 (December) pp 969–1060

Article Index

Number 1

Editorial 1
Effects of repeated loading on creep deflection of reinforced concrete beams
C. G. Koh, K. K. Ang and L. Zhang 2
Optimal plastic limit and shakedown design of bar structures with constraints on plastic deformation
S. Kaliszky and J. Lógó 19
New design method for reinforced sloped embankments
M. E. El-Naggar and J. B. Kennedy 28
Design of horizontally curved waffle slab structures
A. Aly and J. B. Kennedy 37
Multiple *K*-factors of a leaning column
F. Cheong-Siat-Moy 50
Composite damping ratio of seismically isolated regular bridges
J. S. Hwang, K. C. Chang and M. H. Tsai 55
Nonstationary response analysis of offshore guyed tower subjected to earthquake loading
Chung-Son Ryu and Chung-Bang Yun 63
Estimation of along-wind moments in RC chimneys
D. Menon and P. Srinivasa Rao 71
Wind-induced deflections of free-standing lattice towers
M. J. Glanville and K. C. S. Kwok 79
Book Reviews 92
Calendar 95

Number 2

Response of pure-friction sliding structures to bi-directional harmonic ground motion
R. S. Jangid 97
Torsional response of building structures to spatial random ground excitations
Hong Hao 105
Optimal placement of energy dissipation devices for three-dimensional structures
Bo Wu, Jin-Ping Ou and T. T. Soong 113
Characteristics of liquid column vibration absorbers (LCVA)—I
P. A. Hitchcock, K. C. S. Kwok, R. D. Watkins and B. Samali 126
Characteristics of liquid column vibration absorbers (LCVA)—II
P. A. Hitchcock, K. C. S. Kwok, R. D. Watkins and B. Samali 135
Use of ambient response measurements to determine dynamic characteristics of slender structures
L. H. Yam, T. P. Leung, D. B. Li and K. Z. Xue 145
The use of bubble functions for the stability of plates with different end conditions
M. A. Bradford and M. Azhari 151
An alternative method for transient and random responses of structures subject to support motions
J. T. Chen, D. H. Tsaur and H.-K. Hong 162
Numerical representation of Jiang's constitutive equations for a material with temperature-dependent properties
S. Jahanian 173
Effects of member buckling and yielding on ultimate strengths of space trusses
Yeong-Bin Yang, Chien-Tai Yang, Ta-Peng Chang and Ping-Kun Chang 179
Erratum 192
Calendar 193

Number 3

Building pounding damage during the 1989 Loma Prieta earthquake
K. Kasai and B. F. Maison 195
Seismic assessment of concrete bridges using inelastic damage analysis
M. S. Williams and R. G. Sexsmith 208
Low cycle fatigue of RC beams in NSC and HSC
G. Manfredi and M. Pecce 217
Parameter identification for degrading and pinched hysteretic structural concrete systems
S. K. Kunnath, J. B. Mander and L. Fang 224
Review of the torsional coupling of asymmetrical wall-frame buildings
N. T. K. Lam, J. L. Wilson and G. L. Hutchinson 233
Flexural–torsional buckling analysis of arches with warping using DQM
K. Kang and C. W. Bert 247
Relationships between Mindlin and Kirchhoff bending solutions for tapered circular and annular plates
C. M. Wang 255
AWS vs International Design Rules for circular tubular K-connections
Y. Kurobane and K. Ochi 259
Compatibility relationships in a mixed flexibility-based method of frame analysis
A. R. Kemp 267
A strategy for reliability-based optimization
Y. Pu, P. K. Das and D. Faulkner 276
Book Reviews 283
Calendar 285

Number 4

Special issue
Structural optimization
Guest Editors: M. Z. Cohn and G. Thierauf
Editorial 287
Optimization and robustness of structural engineering systems
J. F. Brotchie 289
Problems and prospects of reliability-based optimization
F. Moses 293
On the application of natural algorithms to structural design optimization
W. M. Jenkins 302
Two-level optimization of prestressed structures
U. Kirsch 309
Parallel evolution strategy for solving structural optimization
G. Thierauf and Jianbo Cai 318
Interactive shape optimization of continuum structures
K. Wieghardt, D. Hartmann and K. R. Leimbach 325
Book Reviews 332
Calendar 340

Number 5

Special issue
Stability of structures — a selection of papers presented at the International Conference on Stability of Structures (ICSS-95) held during 7–9 June 1995 at Coimbatore, India
Guest Editors: S. Sridharan and S. Rajasekaran
Editorial 343
Elastic plastic stability of jointed masonry arches
T. E. Boothby 345
Buckling analysis for design of pressurized cylindrical shell panels
S. Yamada 352
Local buckling, strain localization, wrinkling and postbuckling response of line pipe
D. W. Murray 360
Torsion, bending and buckling of steel beams
N. S. Trahair and Y.-L. Pi 372
Design of steel beams and beam columns
J. Lindner 378
Computational bifurcation theory: path-tracing, pinpointing and path-switching
F. Fujii and E. Ramm 385
Book Reviews 393
Calendar 394

Number 6

Modal analysis of close modes using perturbative sensitivity approach
R. M. Lin and M. K. Lim 397
Further studies of practical advanced analysis for weak-axis bending
Seung-Eock Kim and Wai-Fah Chen 407
Nonlinear response and modelling of RC columns subjected to varying axial load
M. A. Saadeghvaziri 417
Shell restraint to ring buckling at cone–cylinder intersections
J. G. Teng and M. Barbagallo 425
The primary bending effect and the buckling boundary-value problem in elastic framed structures
A. N. Kounadis and G. I. Ioannidis 432
Effect of gravity load on seismic response of steel-framed structures
Chang-Ho Park, Dong-Guen Lee and Jin-Keun Kim 439
Seismic response of submerged secondary systems in base-isolated structures
Tae-Myung Shin and Kwang-Joon Kim 452
Instantaneous control of structures with time-delay consideration
L. L. Chung, Y. P. Wang and C. C. Tung 465
Optimization of tuned liquid column dampers
H. Gao, K. C. S. Kwok and B. Samali 476
Modal analysis of an existing offshore platform
H. Hartnett, T. Mullarkey and G. Keane 487
499Frequency-domain dynamic analysis of cables
Yungang Liu and L. Bergdahl 499
Slippage of helical reinforcing on a bent cylinder
J. M. M. Out and B. J. von Morgen 507

Book Review 516
517
Calendar

Number 7

An expert system for concrete bridge management
J. de Brito, F. A. Branco, P. Thoft-Christensen and J. D. Sørensen 519
Structural optimization using response approximation and optimality criteria methods
E. Salajegheh 527
Finite element analysis of floor slabs under warping effect
M. Al-Nasra 533
Effect of member length imperfections on triple-layer space trusses
A. El-Sheikh 540
Shear and attachment effects on the behaviour of rectangular plates resting on tensionless elastic foundation
R. C. Mishra and S. K. Chakrabarti 551
Ductility spectra of reinforced concrete structures subjected to far-field seismic excitations
Hong Hao and Thien-Cheong Ang 568
Irregularities induced by nonstructural masonry panels in framed buildings
P. Negro and A. Colombo 576
Accurate high-speed computation of non-stationary random structural response
Jiahao Lin, Weiping Shen and F. W. Williams 586
A report on Dinar earthquake of 1 October 1995, and response spectra
H. H. Çatal 594
Calendar 603

Number 8

Detecting the size effect in concrete beams using nonlinear fracture mechanics
A. S. E. Morgan, J. Niwa and T. Tanabe 605
Stability design of steel plane frames by second-order elastic analysis
H. Oda and T. Usami 617
A generalized design-based elastoplastic analysis of steel frames by section assemblage concept
Siu-Lai Chan and P. Pui-Tak Chui 628
Soil inertia effects on the bearing capacity of rectangular foundations on cohesive soils
R. Paolucci and A. Pecker 637
Dynamic analysis and response of semirigid frames
E. M. Lui and A. Lopes 644
A comparison of the present SEAOC/UBC torsional provisions with the old ones
M. De Stefano and A. Rutenberg 655
A spurious free four-node displacement-based fluid element for fluid–structure interaction analysis
Young-Surck Kim and Chung-Bang Yun 665
Responses of pipeline structure subjected to ground motion excitation
Yan Yong 679
Behaviour of window glass panels during earthquakes
H. Sucuoğlu and C. V. G. Vallabhan 885
Calendar 695
Announcement 697

Number 9

Displacement-based design approach to earthquake-induced torsion in ductile buildings
T. Paulay 699
Probability-based seismic safety evaluation of existing buildings
J. Kanda, R. Iwasaki, H. Kobayashi and B. R. Ellingwood 708
Detection of structural damage through changes in frequency: a review
O. S. Salawu 718
Structural analysis by an inverse procedure using Bernoulli and Euler functions
Chang-New Chen and Chich-Hsiang Wang 724
Earth pressure coefficients based on the Lade–Duncan failure criterion
P. K. Woodward 733
Shear domain of fibre-reinforced high-strength concrete beams
M. Imam, L. Vandewalle, F. Mortelmans and D. Van Gemert 738
Experimental study of prefabricated funicular shell units
A. Vafai, M. Mofid and H. E. Estekanchi 748
K-factors for braced frames
F. Cheong-Siat-Moy 760
Plastic load capacity and stability of frames in fire
W. Skowronski 764
Study of Eurocode 3 steel connection classification
N. Kishi, R. Hasan, W. F. Chen and Y. Goto 772
A new look at Eurocode 3
M. P. Byfield and D. A. Nethercot 780
Bridge construction technology and the Western influence in modern Japan
H. Isohata and Y. Hanzawa 788
Calendar 795

Number 10

Design of steel frames without consideration of effective length
D. W. White and J. F. Hajjar 797
Mathematical modelling of the ADAS energy dissipation device
A. Tena-Colunga 811
Nonlinear cyclic stress–strain relationship of reinforcing bars including buckling
A. Gomes and J. Appleton 822
Stochastic resistance of square plate under uniaxial compression
Z. Sadovský 827
Critical mode control of a wind-loaded tall building using an active tuned mass damper
L. E. Mackriell, K. C. S. Kwok and B. Samali 834
Safety of reinforced concrete members designed following ACI 318 building code
S. W. Tabsh 843
Stresses in laminated glass subject to low velocity impact
F. W. Flocker and L. R. Dharani 851
Modal analysis of tower–cable system of Tsing Ma long suspension bridge
Y. L. Xu, J. M. Ko and Z. Yu 857
Numerical simulation of the 'pull-in' operation in submarine pipelines
B. P. Jacob, N. F. F. Ebecken and M. G. F. M. Gomes 868
Calendar 877

Number 11

Nonlinear dynamic response of a guyed tower to a sudden guy rupture
N. Ben Kahla 879
Inelastic analysis of partially restrained unbraced steel frames
C. M. Foley and S. Vinnakota 891
Uniform formulae of first- and second-order theory for skeletal structures
H. Rubin 903
Beams on generalized foundations: supplementary element matrices
B. N. Alemdar and P. Gülkan 910
Effect of viscoelastic dampers on hysteretic response of reinforced concrete elements
J. A. Munshi 921
Vibration of simple beams due to trains moving at high speeds
Yeong-Bin Yang, Jong-Dar Yau and Lin-Ching Hsu 936
Influence of current and seabed friction on mooring cable response: comparison between time-domain and frequency-domain analysis
Yungang Liu and L. Bergdahl 945
Seismic upgrade design of a low-rise steel building
F. Nateghi-A. 954
Book Review 964
Erratum 965
Calendar 966

Number 12

Semi-Markovian approach for modelling seismic aftershocks
J. Al-Hajjar, O. Blanpain and J. M. Menu 969
The seismic responses of structure–viscoelastic foundation systems in time domain and power spectra
B. C. Lin, Y. L. Tsaur and T. H. Wu 977
Probabilistic analysis of underground pipelines subject to combined stresses and corrosion
M. Ahammed and R. E. Melchers 988
Resistance factors for blind bolts in direct tension
S. W. Tabsh and S. Mourad 995
Vibration and deflection characteristics of semi-rigid jointed frames
P. P. T. Chui and S. L. Chan 1001
Simple and combination resonances of rectangular plates subjected to non-uniform edge loading with damping
P. J. Deolasi and P. K. Datta 1011
Use of steel bracing in reinforced concrete frames
M. R. Maheri and A. Sahebi 1018
Estimation of system-level ductility demands for multi-story structures
D.-G. Lee, J.-K. Song and C.-B. Yun 1025
The effect of foundation flexibility on the interaction between shear walls and frames
H. A. Toutanji 1036
The optimal cut of sheet metal belts into pieces of given dimensions
S. Mihelcic, T. Slivnik and B. Vilfan 1043
Plastic analysis by quasi-high order Galerkin BEM
Q. Liu, Z. Cen and B. Xu 1050
Book Review 1057
Calendar 1058
